

Figure: CampusRide v4.4 - Requirements x Subsystem Traceability Matrix

S = subsystem satisfies requirement | V = subsystem verifies requirement | Status reflects 2026-04-23 production snapshot.

(R.x label) Requirement	Auth	Ride-Match	Cost-Split	SOS-Safety	Schedule	Comm/Chat	Suggest-Alt	Monitor/Reward	Status	Time Target
R.1 .edu Identity Auth	S							V	Active	Before first session
R.2 Real-time Ride Match	S	S				V			Active	Within seconds
R.3 Verified Profile Badge	S	S							Active	Before booking
R.4 2h Rating Window					S			V	Active	Departure +2h
R.5 Bidirectional Rating Persist					S			S	Active	Departure +2h
R.6 Avg-Rating Recompute								S	Active	On rating UPSERT
R.7 Rating Update-in-Place					S			S	Active	Anytime post-rating
R.8 Ride-Scoped Group Chat	V	S				S			Active	On first booking
R.9 WeChat Outreach Push						S	S		Active	On createRide
R.10 Cross-Module Points	V				V			S	Specified	Planned ahead

Legend: S Satisfy (subsystem implements requirement) V Verify (subsystem checks / observes requirement)

Status: Active Specified Pending
