

Rating window: when can riders and drivers rate each other?

The post-trip window opens 2 hours after the trip ends; ratings are recorded but remain revisable thereafter.

Bidirectional rating: each side rates the other, then averages update

Snapshot: 0 ratings submitted in production (formative design, not yet validated by usage).

Open design proposals (not yet implemented)

- Pre-publication dispute window (flag a rating before it goes live)
- Cross-trip trend protection (buffer against retaliatory dips)
- Mandatory justification (low scores require a written reason)
