

Requirements specification by design primitive

Twelve concept-level requirements grouped by primitive; Safety carries the highest-priority band by design.

Category	Req ID	Statement	Source	Priority
Identity	R1.1	Only verified campus members can access ride and activity modules.	Beat 3 - identity primitive	High
	R1.2	Every profile card shows a verified-campus badge alongside the name.	Beat 5 - rider trust signal	High
	R1.3	Guests may browse posts read-only without the ability to message.	Beat 7 - sample scoping	Medium
Safety	R2.1	First-message contact requires the receiver to reply before a thread opens.	Beat 5 - cold-DM concern	High
	R2.2	Trip-bound chat closes automatically one hour after the trip ends.	Beat 6 - trip-bound chat	High
	R2.3	Check-in is granted only inside the venue radius and time window.	Beat 6 - check-in design	High
Rating	R3.1	The rating prompt opens two hours after the trip ends, not in the vehicle.	Beat 5 - F4 rating fairness	High
	R3.2	Driver and passenger rate each other independently and bidirectionally.	Beat 5 - F4 mutual rating	High
	R3.3	A user may revise their own rating until the dispute window closes.	Beat 7 - dispute scoping	Medium
Rewards	R4.1	Posting a trip, activity, or item earns campus points on completion.	Beat 6 - rewards loop	Medium
	R4.2	Point balance updates atomically so award and redemption never desync.	Beat 6 - rewards integrity	Medium
	R4.3	Highest-value redemptions are gated behind a verified-campus badge.	Beat 7 - gamification risk	Low

Priority key:

High

Medium

Low

Accent marks the top-priority category (Safety).
