

Requirements traceability across CampusRide modules

Each requirement is owned by one module (accent) and supported by neighbours; survey findings F3, F4, F5 anchor the design intent.

Cornell-only identity check before first session	primary	supports	supports	supports	supports	supports
Verified-profile badge visible at booking	primary	supports		supports		
Real-time trip matching for short campus hops (F3)	primary				supports	
Cost-sharing transparent to both sides (F4)	primary					supports
Driver supply incentives for long-distance routes (F4)	primary					supports
Bidirectional rating, deferred 2 hours after trip (F5)	primary				supports	
Rating remains revisable to soften driver-side asymmetry (F5)	primary					
Trip-bound chat that expires shortly after arrival	supports			supports	primary	
External outreach when supply is thin (WeChat post queue)	supports				primary	
Cross-module points ledger as a soft reward layer	supports	supports	supports	supports		primary
Campus-marketplace listings reusing the verified identity		primary			supports	supports
Activities sign-up with venue radius and check-in window			primary		supports	supports
Group spaces for recurring cohorts (clubs, dorms)				primary	supports	supports
	Carpool	Marketplace	Activities	Groups	Messages	Points
	primary owner	supports the requirement	F3, F4, F5 = formative-survey findings
