

Contradiction map — 28 flagged contradictions across the 7-beat structure

Flow: each contradiction is a unit of vertical thickness. Left band colour = argument line (motivation/framework/primary/adversarial/cross-line). Right band colour = severity (critical/moderate/minor). Beat tags encode primary attachment in the 7-beat paper structure; '2+7' and '3+7' denote cross-beat span. Beat 6 has no contradictions because it is the artifact-description beat — claims are about implementation, not literature.
